

# SAP S/4HANA – Update on transition scenarios

José Carlos González Vargas  
Noviembre, 2017

SAP INTERNAL

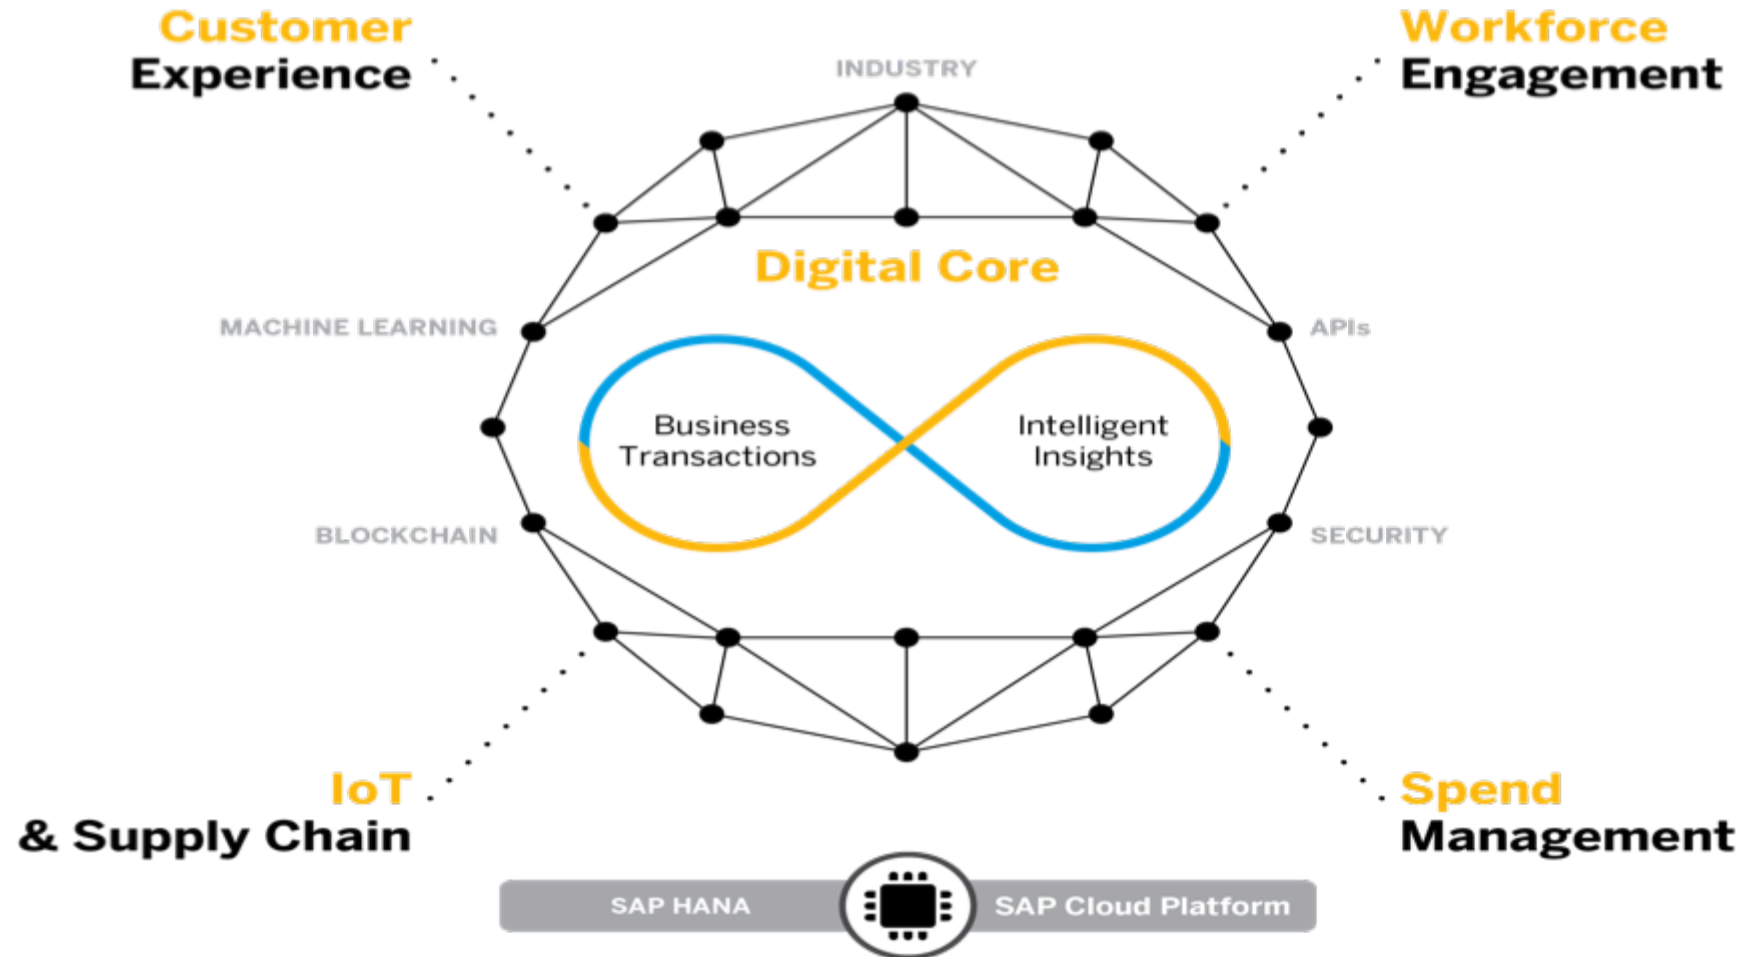

# Agenda

## SAP S/4HANA

- Digital Business Framework
- Overview Transition Scenarios
- System Conversion
- Readiness Check
- Next Steps

# Digital Business Framework

## Digital business framework

# Comparing Traditional ERP to the Digital Core

Traditional ERP	Digital Core Live Business
 Siloed Data	 Unified data in real time
 Partially connected	 Fully connected to customers, suppliers and workforce
 Reporting tool	 Intelligent, predictive tools based on patterns and trends

**35,000**

SAP customers already  
have an ERP core

industries

Lines of  
Business

countries

# What is S/4HANA?

## SAP S/4HANA Enterprise Management – build the next-generation business suite

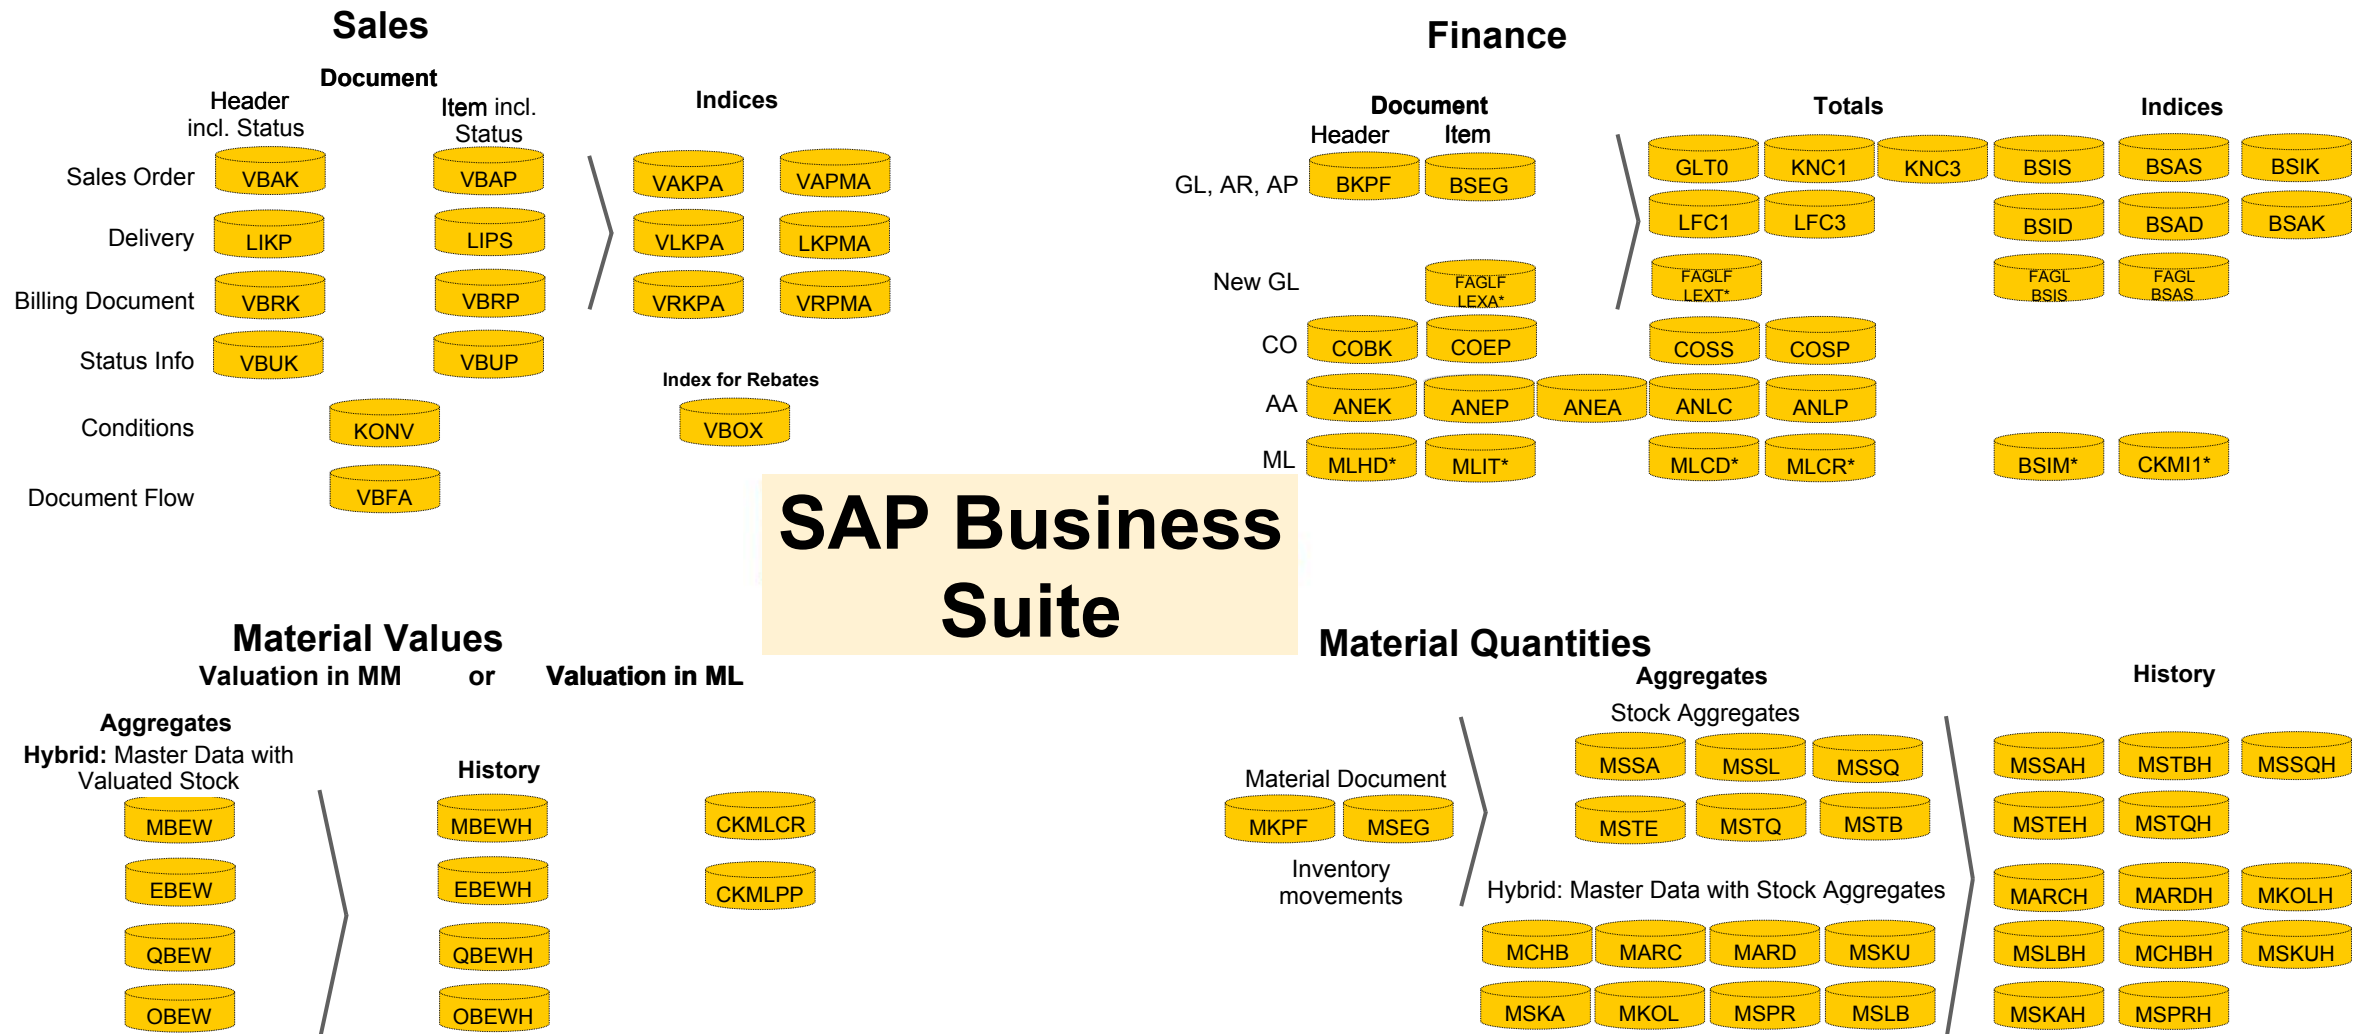

- » Innovative in-memory database
- » New architecture and data models
- » Renewed applications
- » New user interface (UI) technology
- » Cloud and on-premise deployment models
- » Natively integrated

**SAP S/4HANA is a new product line** (it is not a legal successor of any SAP Business Suite product).

The classical SAP Business Suite and SAP ERP software is a separate product line and will still be available.

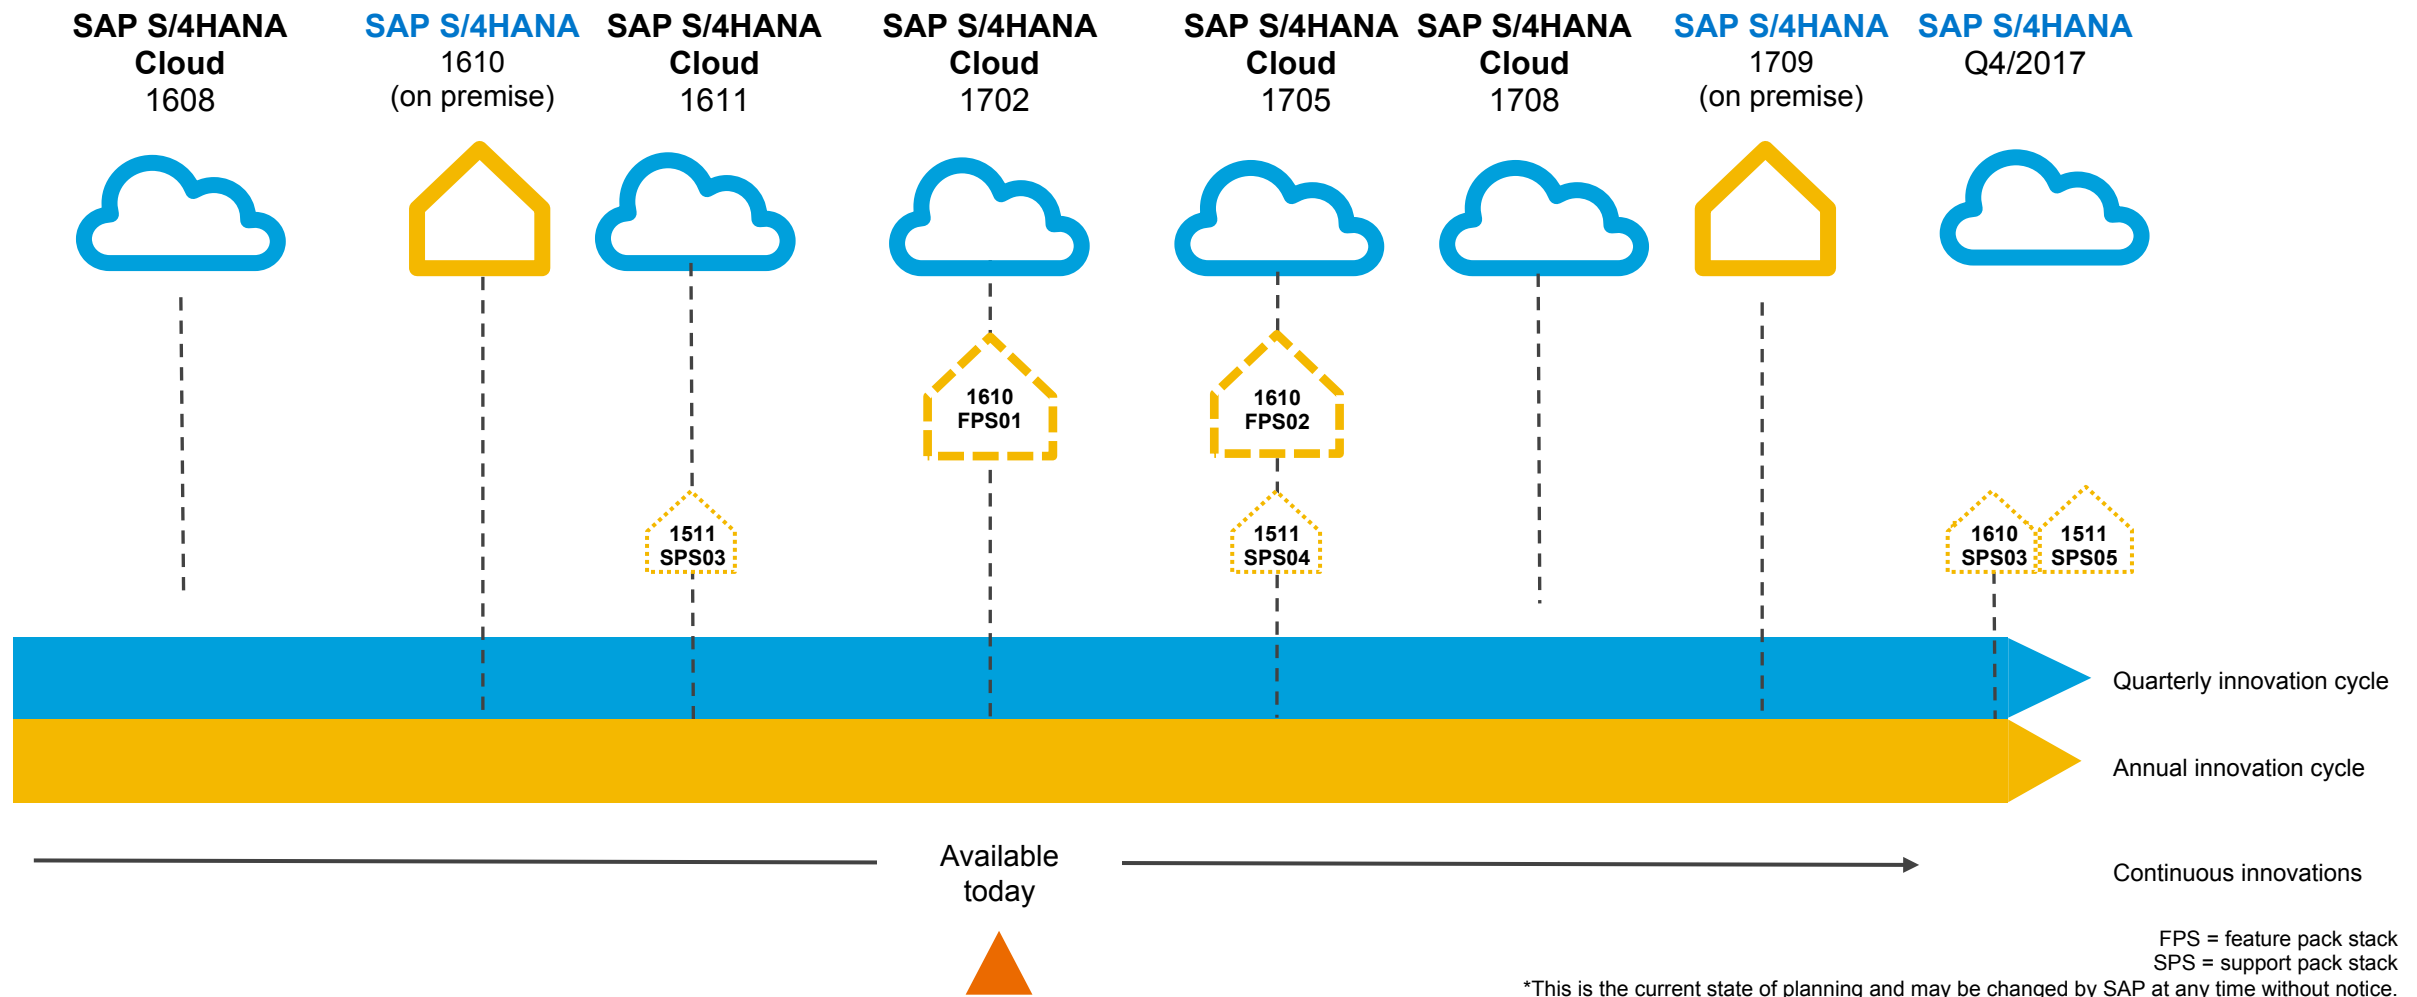

# SAP S/4HANA Database & Table Structures

# SAP S/4HANA – Overview Transition Scenarios

# S/4HANA Innovation Schedule

# Transition to SAP S/4HANA

## Three different approaches to move to SAP S/4HANA

### System Conversion

SAP ERP System

SAP S/4HANA

On-Premise

### Bring your business processes to the new platform

- A complete technical in-place conversion of an existing SAP Business Suite ERP system to SAP S/4HANA.
- Adopt new innovations at your speed

### New Implementation

SAP ERP or  
3<sup>rd</sup> -party  
System

On-Premise

S/4HANA Cloud

### New implementation / re-implementation

Reengineering and process simplification based on latest innovations

- Implement innovative business processes with best-practice content on a new platform
- Perform initial data load
- Retire old landscape

### Landscape Transformation

SAP ERP System  
Region A

SAP ERP System  
Region B

SAP ERP System  
Region C

SAP S/4HANA

On-Premise

### Value driven data migration to the new platform

e.g. consolidation of current SAP Business Suite landscape into one global SAP S/4HANA system or selective data migration based on legal entities

# The SAP S/4HANA family and transition paths

## SAP Business Suite

(e.g. BS7i2013)

SAP ERP System  
(on AnyDB)

or

SAP ERP System  
(on SAP HANA)

## SAP S/4HANA family

**New implementation only!**

S/4HANA Cloud

SAP S/4HANA Finance  
1503, 1605

SAP S/4HANA  
(On-Premise)

- System Conversion
- New Implementation
- Landscape Transformation

# Transition to SAP S/4HANA

## Scenario 1 – System Conversion

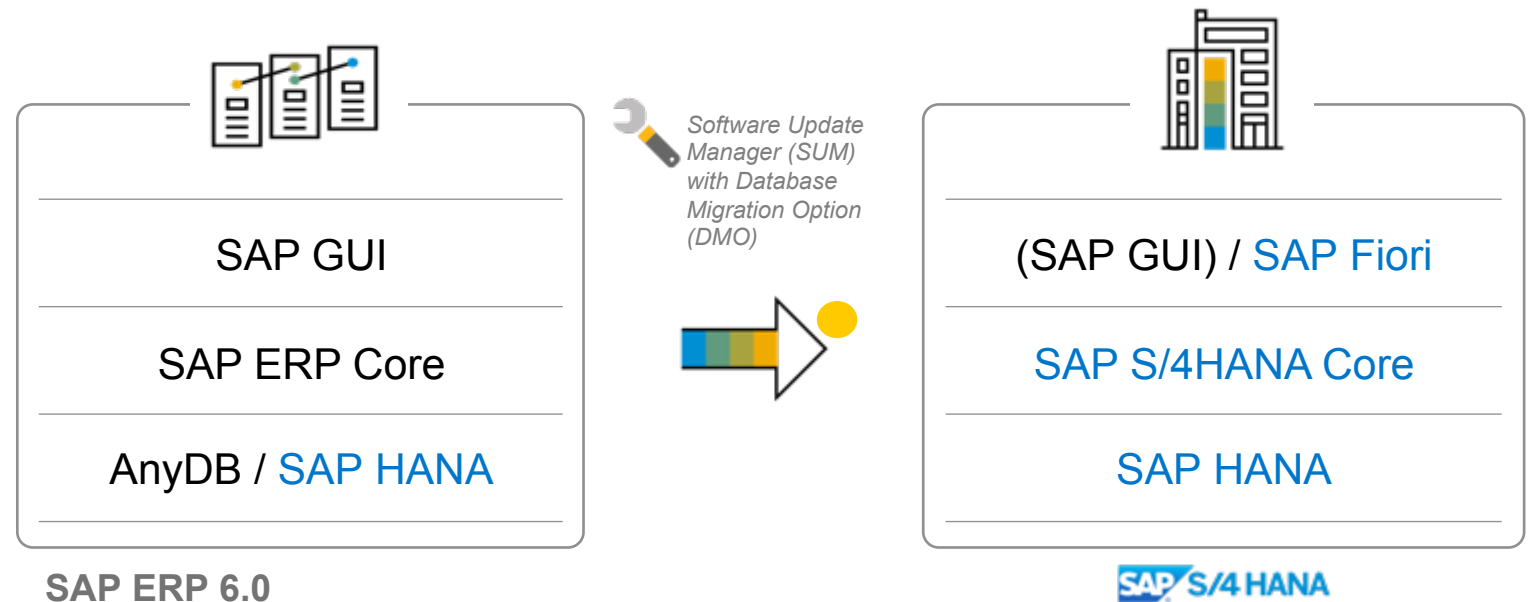

### Scenario description

- A complete technical in-place conversion of an existing SAP Business Suite ERP system to SAP S/4HANA (Database, SAP NetWeaver and Application transition in one step).

### Why would you choose this Option?

- Bring your existing business processes to the new platform.
- Keep your investment in custom code
- Mitigate the risk and investment of a big bang conversion project by reducing the scope of the transition project to a pure technical conversion project, and adopt new innovations at your speed at a later point of time and in a phased approach.

What	How
 In-place technical conversion	tool-based technical conversion process of a SAP Business Suite ERP system to SAP S/4 HANA using SAP Software Update Manager (SUM); Downtime minimizing options available

# Transition to SAP S/4HANA

## Scenario 2 – New Implementation

### Scenario description

New implementation of SAP S/4HANA, e.g. for customers migrating a legacy system, also known as “greenfield” approach.

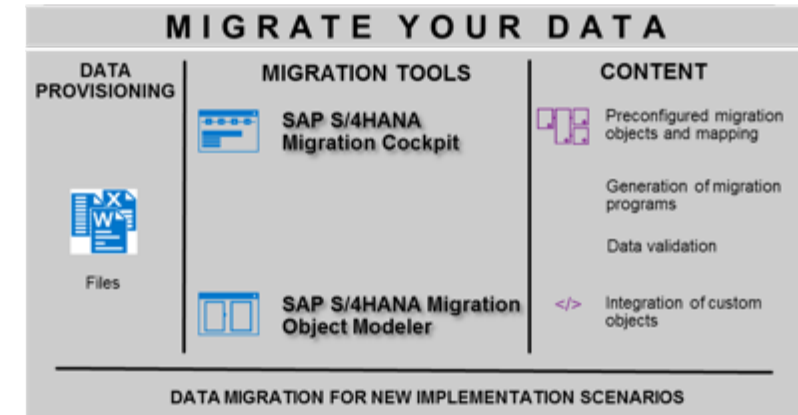

### Why would you choose this Option?

Customers planning to migrate

- a non-SAP / 3rd-part legacy system,
- an good option for a SAP System, which may be
  - of an older release and/or
  - is highly customized/modified and/or
  - does not meet the system requirements for a technical system conversion

Benefits for the customer are

- Reengineering and process simplification based on pre-configured business processes
- Rapid adoption of new innovations in a standardized manner

Steps	How
 Install SAP S/4HANA	Software Provisioning Manager
 Initial data load from source system	<ul style="list-style-type: none"> <li>• <b>SAP S/4HANA Migration Cockpit</b></li> <li>• <b>SAP Data Services (SAP DS)</b></li> </ul> <b>both with Best Practice Migration content</b>

# Transition to SAP S/4HANA

## Scenario 3 – Landscape Transformation

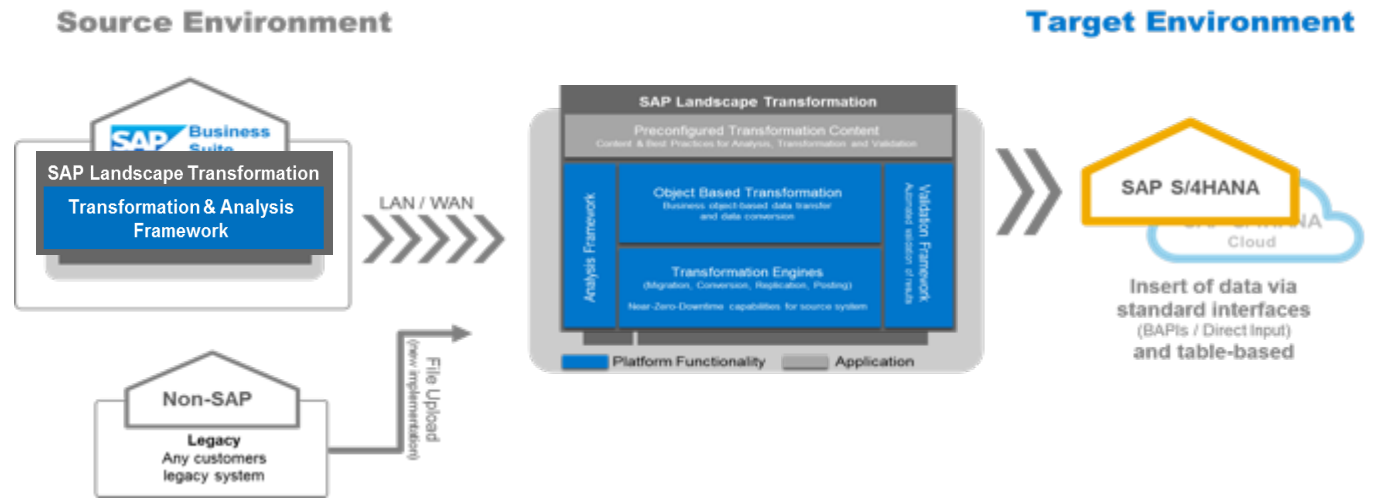

### Scenario description

Customers who want to consolidate their landscape or to selectively transform data into a SAP S/4HANA system.

### Why would you choose this option?

- Value-based migration: selective data transformation allows a phased approach focusing the first SAP S/4HANA migration phase on parts of the business with highest ROI and lowest TCI
- Agility: stay on current business processes but move gradually to SAP S/4HANA innovations → Move to SAP S/4HANA at your own pace
- TCO reduction: system and landscape consolidation with harmonized/simplified processes and unified master data lead to lower cost of operations

### SAP Landscape Transformation

Technical migration on table level using pre-configured LT transformation solutions

Consolidation

System Merge of multiple source systems into one new or existing SAP S/4HANA system (build-up multiple client system)

Selective Data Transformation

Migration of business units/single entities such as company code

Implementation of SAP Central Finance

Implementation of S/4HANA Central Finance including real-time reposting of financial transactions into Central Finance instance (synchronization of systems)

# SAP S/4HANA – System Conversion

# SAP S/4HANA

## System Conversion – Transition Paths Overview (1/2)

SAP LABS PREVIEW

The transition to SAP S/4HANA does **not** require the source system to be already on SAP HANA Database

**System Conversion Paths (basically)**  
**From** SAP Business Suite  
(ERP6.0, EHP 07, Any DB or SAP HANA DB)  
**to** SAP S/4HANA 1709 SPS00

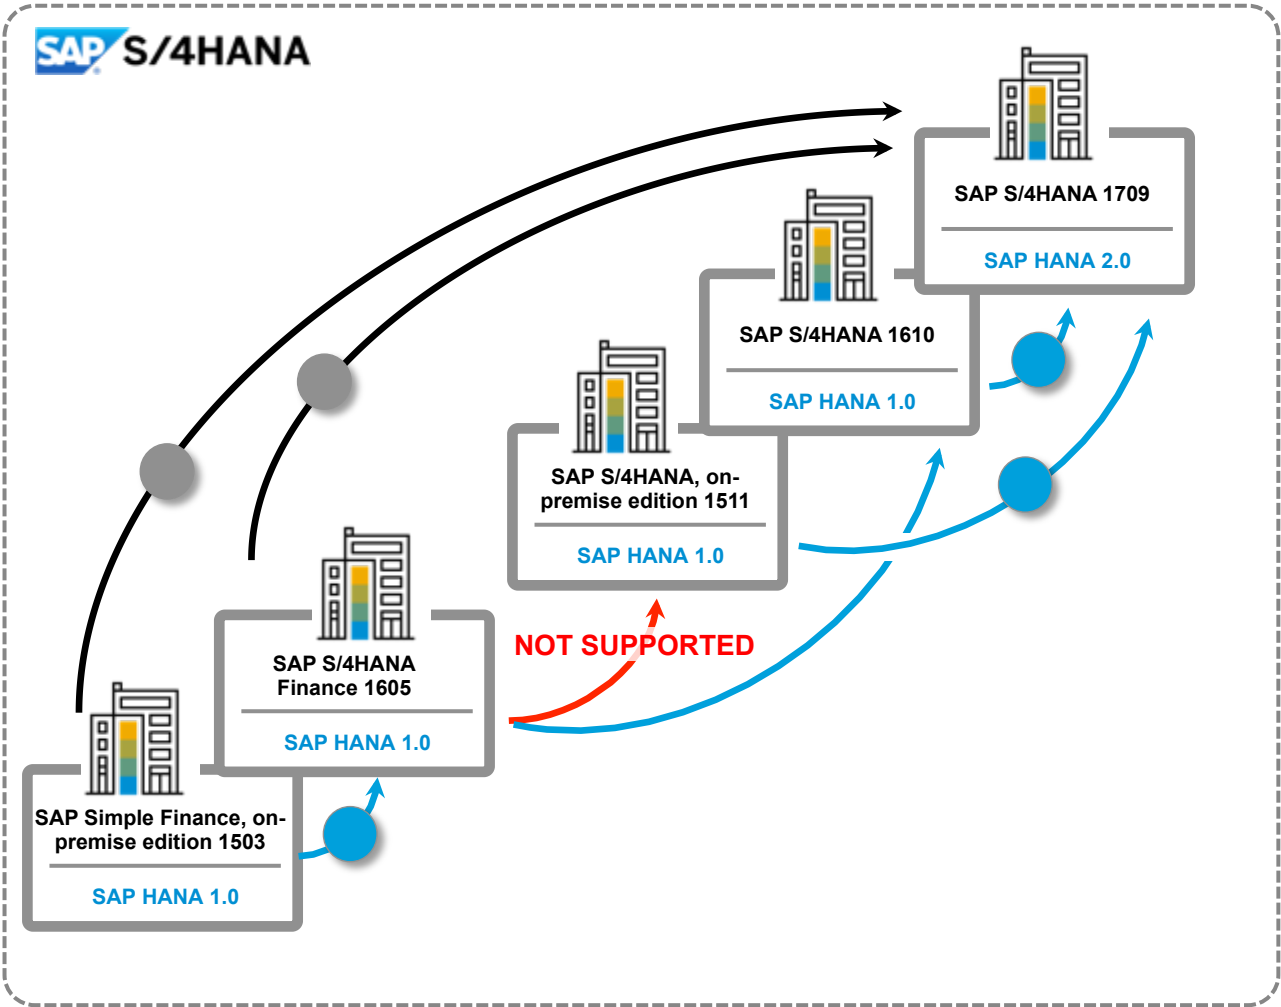

**Note 1:** For older SAP Business Suite releases or systems on Non-Unicode an additional step to SAP ERP 6.0 EHP07 is required.

**Note 2:** System has to be an AS ABAP-only system. Dual-stack systems (AS ABAP and AS Java combined in one system) are not supported for the conversion. If your system is as dual-stack system, you have to split it before doing the conversion.

# SAP S/4HANA

## System Conversion – Transition Paths Overview (2/2)

SAP LABS PREVIEW

Start Release	Target Release	Availability	Remarks
● SAP S/4HANA Finance 1605	SAP S/4HANA 1709	Planned for: Q4/2017	Update DB to SAP HANA 2.0 and Installation of S4CORE Software
● SAP Simple Finance, on-premise edition 1503	SAP S/4HANA 1709	Planned for : Q4/2017	Update DB to SAP HANA 2.0 and Installation of S4CORE Software
● SAP Simple Finance, on-premise edition 1503	SAP S/4HANA Finance 1605	available since: Q2/2016	Installation of sFIN Software ( <b>Upgrade</b> )
● SAP S/4HANA 1610	SAP S/4HANA 1709	Planned for: Q4/2017	Update DB to SAP HANA 2.0 and Installation Software ( <b>Upgrade</b> )
● SAP S/4HANA, on-premise edition 1511	SAP S/4HANA 1709	Planned for: Q4/2017	Update DB to SAP HANA 2.0 and Installation Software ( <b>Upgrade</b> )

- **System Conversion from** SAP S/4HANA Finance to SAP S/4HANA
- **Upgrade within the** SAP S/4HANA product family

# SAP S/4HANA 1709 - Benefits

## Innovations – Lines of Business (LoB)\*

### Finance

#### Central finance

- Shared Services in Accounts Payables/Receivables
- Central reversal and correction capabilities
- Financial reporting scenarios

#### SAP Fiori apps (enhancements)

Accounts Payable/Receivable Accountant; Accounts Receivable Manager; Controller (Production Costs, Credit); Treasury Risk Manager; Asset Accountant; General Ledger Accountant; Inventory Accountant.

**Parallel valuation:** 3rd currency in Controlling and Cost of Goods Manufactured.

**Real-Time Consolidation:** Intercompany transaction elimination; Validation at Source for Consolidation.

**Business Reporting:** Cash Flow Statement; Parallel Value Flow with Enhanced multiple Valuation and Currencies.

**Universal Journal:** Subsequent implementation of document split

**Treasury and Risk Management:** Foreign Currency Hedge Management and Accounting; Integration of SD into Trade Finance

**Cash Management:** Bank relationship management including bank fee analysis; Improved Integration with Bank Communication Management and In-House Cash  
Clear incoming bank statements with machine learning solution (Connectivity with SAP Cloud Platform)

**Financial Planning:** Basic Sales Planning (Activity Price, Consumption)

**Accounting:** G/L document split / Financial Closing Cockpit

**Soft close and prediction:** Minimum closing time; Early insight into business trends

**Integration:** Seller-side integration with Ariba Network (invoice and discount management); Cost center (SAP SuccessFactors); Payment advice (SAP Fieldglass); SAP Ariba Pay for Credit Card Payment

# S/4HANA – Readiness Check

SAP Readiness Check

Database migration

Software update

Data conversion

- A holistic system analysis is the foundation for further planning steps toward a successful and smooth SAP S/4HANA system transition.
- The SAP Readiness Check for SAP S/4HANA summarizes the most important aspects of the conversion in an easily consumable way.

# SAP Readiness Check for SAP S/4HANA

## Custom Code & Custom Dev

- Custom Code must be analyzed with respect to SAP S/4HANA compliance, based on the SAP simplification database
- SAP Readiness Check provides BOM of affected objects as well as SAP Custom Development Projects (CDP's)
- An in-depth custom code management activities to follow during project execution

## AddOn's & Business Functions

- SAP AddOn's and Business Functions as well as 3rd party AddOn's have to be checked for their compatibility with SAP S/4HANA
- SAP software is listed and rated
- 3rd party software is listed only

## S/4HANA Sizing

- To prepare for SAP S/4HANA, a system sizing is the baseline for further discussions regarding the future target size
- SAP Readiness Check summarizes the technical sizing result so that customers can further engage internally, with SAP or with partners to discuss the future target system size

## Simplification items

- Simplification Items represent application or architecture changes in comparison to ERP
- About 470 Simplification Items exist for S/4HANA 1610
- They are grouped by business priority (e.g. Core Finance) and industry, respectively

## Recommended Fiori Apps

- Fiori apps recommended based on the transaction usage history in the evaluated system

## Transactions

- SAP GUI transactions replaced or deprecated in SAP S/4HANA, such as Classic MM-PUR GUI transactions

# SAP Readiness Check for SAP S/4HANA

## Approach

### 1. Prepare source system

- Minimum release: SAP ERP 6.x EhP0 on any database
- Help portal: [https://help.sap.com/viewer/p/SAP\\_READINESS\\_CHECK](https://help.sap.com/viewer/p/SAP_READINESS_CHECK)
- SAP Readiness Check tool preparation note: [SAP Note 2290622](#)

### 2. Execute program SAP Readiness Check

- Via your local SAP Solution Manager system (recommended)
- Via our direct cloud upload

### 3. Explore results to start Conversion project

- Recommendations dashboard per system, sent via email as url link
- Engage [SAP Digital Business Services](#) or your preferred implementation partner
